Topic-wise Bank PO/ Clerk Prelim & Mains Solved Papers Quantitative Aptitude 2nd Edition consists of past solved papers of Bank Exams - IBPS PO, IBPS Clerk, SBI PO, SBI Clerk and Specialist Officer from 2010 to 2018. • The coverage of the papers has been kept RECENT (2010 to 2018) as they actually reflect the changed pattern of the Banking exams. Thus the papers prior to 2010 have not been included in the book. • In all there are 38 Question papers from 2010 to 2018 which have been provided topic-wise along with detailed solutions. • Practicing these questions, aspirants will come to know about the pattern and toughness of the questions asked in the examination. In the end, this book will make the aspirants competent enough to crack the uncertainty of success in the Entrance Examination. • The strength of the book lies in the originality of its question papers and Errorless Solutions. The solution of each and every question is provided in detail (step-by-step) so as to provide 100% concept clarity to the students.

Variability in predispositions for language learning has attracted scholarly curiosity for over 100 years. Despite major changes in theoretical explanations and foreign/second language teaching paradigms, some patterns of associations between predispositions and learning outcomes seem timelessly robust. This book discusses evidence from a research project investigating individual differences in a wide variety of domains, ranging from language aptitude over general cognitive abilities to motivational and other affective and social constructs. The focus lies on young learners aged 10 to 12, a less frequently investigated age in aptitude research. The data stem from two samples of multilingual learners in German-speaking Switzerland. The target languages are French and English. The chapters of the book offer two complementary perspectives on the topic: On the one hand, cross-sectional investigations of the underlying structure of these individual differences and their association with the target languages are discussed. Drawing on factor analytical and multivariable analyses, the different components are scrutinized with respect to their mutual dependence and their relative impact on target language skills. The analyses also take into account contextual factors such as the learners' family background and differences across the two contexts investigated. On the other hand, the potential to predict learner's skills in the target language over time based on the many different indicators is investigated using machine learning algorithms. The results provide new insights into the stability of the individual dispositions, on the impact of

contextual variables, and on empirically robust dimensions within the array of variables tested.

----- Mathematics is integral part of competitive exam.

The subject is used starting from daily life to advanced scientific field. Over the generation mathematics has become the language of science & played immense role in advancing human culture. The subject is integral part of school curriculum still many student find the subject difficult. No matter how hard we try, we can't run away from at least basic mathematics. Because it requires in almost all business. The math develops logical, rational thinking. Its not only just solving problem but it is the way to deal with unknown situation use the resource, knowledge at our hand. To master this subject, conceptual study is required. But most of time student run behind thousands of shortcut. Shortcuts varies from problem to problem. Hence by such approach to master in subject one has to remember thousands of unnecessary shortcuts. Its is stressful & often decreases accuracy. So instead of learning thousands shortcuts, its better to understand subject logically, conceptually. Such one time learning give advantages to student lifetime. This book gives generic concept by using which one can solve problem faster than shortcuts. Since, methods are generic. So they are limited. Many methods in this books are the result of deep insight, understanding research in subject & they are not available elsewhere. Editing this book was quite hectic process. The different colours are added to make explanation easy to understand. -----

----- The book presents innovative quicker methods of quantitative aptitude. It teach subject conceptually by using visual approach... "One picture is better than 1000 words" Useful for all competitive exams. I) Colorful chapters, plenty of examples II) Quicker innovative methods for competitive mathematics etc... III) Solve math problem at speed of light, clarifies concept, builds number sense, awakes visualization, imagination, prediction, prediction & interpretation ability... IV) Mathematics is not just subject to study for exam & score it maximum, but it is foundation of every rational approach, evolving scientific age... Improved logical ability, number sense helps to take more rational, better decision .... For more detail refer -->
