#2523562 champion99 - 11/14/11 07:13 please who can give me an explanation for number 41--- really thought i was doing well but then i just discovered this was the block that pulled my scores low---i got a 460--corresponding to a 212----my exm is on the 27th o December---wiill appreciate your comments Report ...NBME 12 | Nerve | Asthma* NBME 12 Block 1 q1-50 Discussion #749199 : ae0704 - 09/15/13 13:42 : Hello everyone, some people use the offlines NBME as a tool for their training while studying, since Maryam2009 discussion of this NBME is not longer available, i will begin to post the answers and explanations of each question, following the one posted on scribd.NBME 12 Block 1 q1-50 Discussion - USMLE Forumanswers to stepprep's nbme 12 - Free download as Text File (.txt), PDF File (.pdf) or read online for free. real simple, here are the answers, in order from 1-50, all blocks booyahanswers to stepprep's nbme 12 - ScribdI think with these NBME problems though, if you can get the answer within one "step" that should be your choice. Here you can just go Squamous Cell Carcinoma with a direct action on serum calcium levels (via PTHrP). Thyroid requires a few more steps, (assuming your statement is true) so in the eyes of NBME, it ain't gonna be the right choice.NBME AnswersNBME Answers and Explanations! After the cuff is tied, the cells and tissue distal to the cuff will continue consuming ATP (ATP->ADP), but no fresh blood will be delivered to "clear" what will be an accumulating amount of ADP and other metabolites.ADP (=Adenosine) is itself a proxy of consumption and drives vasodilation of arteries!NBME 24 AnswersNBME Answers and Explanations! I missed this as well because I completely overthought it since they had to add (vasopressin) instead of just saying ADH which made me think of its role in constriction of smooth muscle, but the point is that there will be pooling of the blood volume in the viscera and vital organs which will increase ANP release from the atria and since ANP is released
