The private business sector suffered both directly and indirectly from the terrorist strikes of September 11th. Many business workers perished in the New York World Trade Center, and the insurance, transport, and tourism industries were hard hit by the aftermath. Restrictions imposed in the name of security made business travel and the movement of goods more complicated. The private sector was called upon to support the fight against terrorism actively with tougher controls on money transfers and on the export of dangerous materials and technologies. These events offered a striking case of the growing interdependence of the private and public sectors in tackling present-day security challenges. The impact of the private sector, for good or ill, in areas of conflict has long been recognized. Private business is at the centre of the latest concerns over the vulnerability of crucial infrastructures, including energy supply. Systematic public-private sector consultation and partnership are needed to tackle these problems, but neither the principles nor comprehensive mechanisms for such cooperation have yet been identified. This book brings together reflections on general and specific aspects of public-private sector interaction, from a variety of experts in business, government, international organizations and the academic world. For completeness and balance, it also inquires into the costs of security and includes perspectives from Africa and the Arab World. It offers new reference material to help in the further exploration of this important subject.

Government Alone Can't Solve Society's Biggest Problems World hunger. Climate change. Crumbling infrastructure. It's clear that in today's era of fiscal constraints and political gridlock, we can no longer turn to government alone to tackle these and other towering social problems. What's required is a new, more collaborative and productive economic system. The Solution Revolution brings hope—revealing just such a burgeoning new economy where players from across the spectrum of business, government, philanthropy, and social enterprise converge to solve big problems and create public value. By erasing public-private sector boundaries, the solution economy is unlocking trillions of dollars in social benefit and commercial value. Where tough societal problems persist, new problem solvers are crowdfunding, ridesharing, app-developing, or impact-investing to design innovative new solutions for seemingly intractable

problems. Providing low-cost health care, fighting poverty, creating renewable energy, and preventing obesity are just a few of the tough challenges that also represent tremendous opportunities for those at the vanguard of this movement. They create markets for social good and trade solutions instead of dollars to fill the gap between what government can provide and what citizens need. So what drives the solution economy? Who are these new players and how are their roles changing? How can we grow the movement? And how can we participate? Deloitte's William D. Eggers and Paul Macmillan answer these questions and more, and they introduce us to the people and organizations driving the revolution—from edgy social enterprises growing at a clip of 15 percent a year, to megafoundations, to Fortune 500 companies delivering social good on the path to profit.

Recyclebank, RelayRides, and LivingGoods are just a few of the innovative organizations you'll read about in this book.

Government cannot handle alone the huge challenges facing our global society—and it shouldn't. We need a different economic paradigm that can flexibly draw on resources, combine efforts, and create value, while improving the lives of citizens. The Solution Revolution shows the way.
